

## MALLA REDDY FOUNDATION FOR RESEARCH & INNOVATIONS

*Promoting healthcare innovation by converting ideas into products and solutions...*

Malla Reddy Foundation for Research and Innovations (MRFRI) is an Incubator that supports every budding Medtech innovator and startup in their growth journey. Our network of experienced clinicians, academicians, founders, mentors and team members aims to give the right opportunity to young talent and budding startups with the right guidance, clinical immersion, clinical validation trials and regulatory support.

MRFRI, located in Malla Reddy Vishwavidyapeeth (MRV) campus Suraram, Hyderabad came into existence in January 2020 with a vision to support startups and innovators working in the field of medical technology and Innovative solutions in the healthcare domain which can be deployed in Public Health Systems with clinical, societal and commercial impact. The idea was to deepen the entrepreneurship and incubation culture of the Institute.

MRFRI, MRV aims to develop innovative solutions in healthcare backed by medical science and cutting-edge technologies to solve the pressing problems of the public healthcare system of the country. MRFRI provides the right space and opportunities for budding innovators and startups to develop their ideas and solutions into products and businesses.
