## About CPD

Operative Obstetrics encompasses the surgical procedures and interventions used during childbirth to facilitate delivery and address complications aiming to ensure a safe and successful motherhood.

This academic program aims at enlightening us on structured approach and targeted skill in significant operative obstetrics by eminent speakers. We are also conducting hands on workshop and drills on operative obstetric management which would further promote to build and maintain competence of clinicians, especially those working with limited resources and post graduate students.

So lets get prepared to tackle these emergent conditions to decrease the maternal and perinatal mortality and thereby build a strong and healthy nation.
