### MD, DM (Gastro)

Dear Students, Faculty, and Esteemed Well-Wishers,

It is with immense pride and a deep sense of responsibility that I assume the role of Chancellor at Malla Reddy Vishwavidyapeeth, Deemed to be University, Hyderabad. As we embark on this transformative journey together, I am inspired by our shared commitment to academic excellence, innovation, and societal impact.

Our university is home to a constellation of prestigious institutions, each a beacon of specialized knowledge in the fields of education viz. # VICE CHANCELLOR

## Dr. Balakrishna P. Shetty

**MBBS, MD (USA).**
**US Board Certified Fellow, Pediatric Radiology, Body Imaging.**

Dear Students, Faculty, and Esteemed Stakeholders,

We take great pride in being a Deemed-to-be University at the forefront of innovation in teaching, learning, and research. Our academic philosophy is centered on enhancing student employability and supporting a wide range of career pathways through our comprehensive RISE framework — Research, Innovation, Startups, and Entrepreneurship. Among our many groundbreaking initiatives, a few standout projects include:

a. International and Industrial Collaborations: To promote joint academic programs, faculty/ student exchanges, research projects in areas such as technology, healthcare, sustainability, and entrepreneurship.

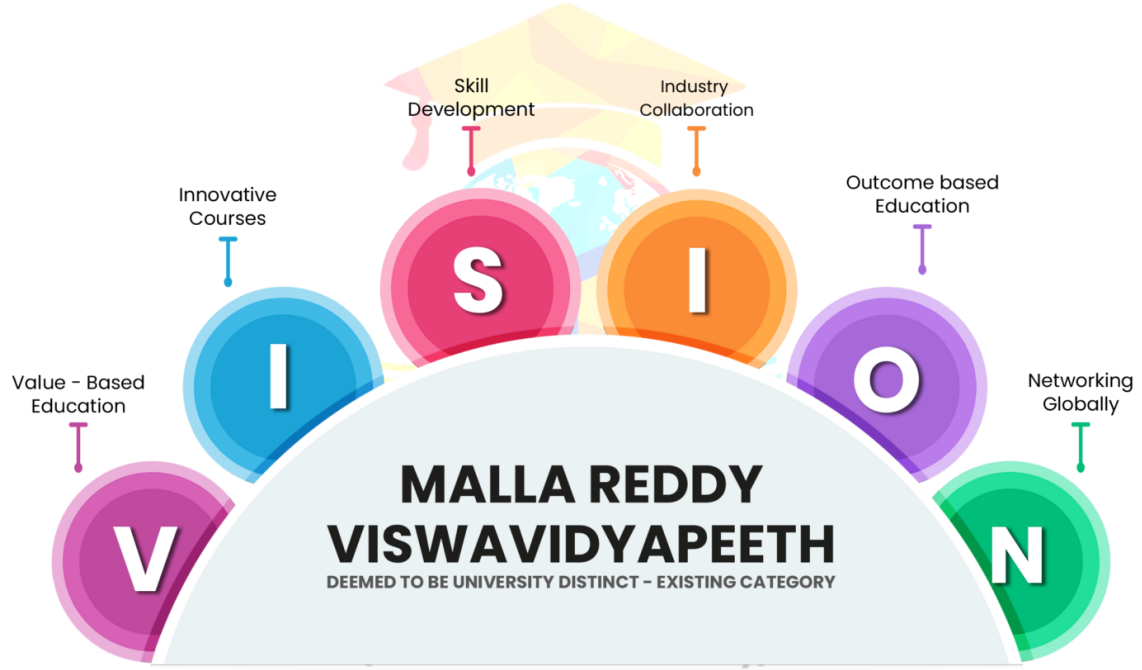

b. Research Innovations: Action Research: Is a family of research methodologies that pursue action (or change) and research (or understanding) at the same time. Community Research: Instead, data on patients visiting the Hospital, takes place in community settings and involves community members in the design. Student Research: Students can mail to the Pro-Chancellor at vcdrshetty@mrvv.edu.in, research grants are disbursed directly to students, eliminating intermediate delays and administrative hurdles.

c. Integrated Development, Structure, and Function (DSF) module: A comprehensive understanding of basic sciences. Likewise, clinical manifestations of common systemic diseases such as Diabetes, Hypertension, and Tuberculosis are taught in an interconnected format, rather than as isolated topics.

d. Answer First and Discuss Next: (Z-A technique): Instead of one-way lectures and repetitive slide presentations, students are required to read the subject matter in advance, 10–20 thought-provoking questions, clinical images, or case scenarios are presented to the entire class. All students write their responses individually, which are then discussed in an interactive session led by faculty.
